

Employer Superannuation as a Benefit

AXIS Fact Sheets indicate approved products based upon a detailed examination of design capability and performance. The most common reason why other employer super platforms were not approved is generally scale (FUA under \$30 billion). Attention is given to cost structure, product functionality, MySuper Investment Default design and performance and then the potential improvement in projected income in retirement if the product's investment choice menu is used.

The AXIS Assessment

CORPORATE PRODUCT ASSESSED	MLC MASTERKEY BUSINESS SUPER	APPROVED
----------------------------	------------------------------	----------

- MLC MasterKey Business Super has a reasonable investment choice menu, the main criticism being that approximately half are own label
- The MySuper Investment Default option is referred to as a glide path in terms of initial exposure to growth assets (85%/15%) before de-risking commences from age 55
- The majority of member clients within MLC MasterKey Business Super are dependent upon the performance of their MySuper Investment Default, a peer group comparison based upon projected income in retirement to age 67 being:

Projected Income in Retirement to age 67 Based on MySuper			
Age	25	35	45
MLC MasterKey Business Super	\$33,600	\$28,800	\$26,700
Comparable Product	\$32,000	\$27,100	\$24,900
Performance Variation	5%	6%	7%

The projection is just an estimate, not a guarantee. The actual money you receive in your retirement may be very different from this estimate and can be impacted by a number of factors such as the investment option you choose, investment returns, fees, contribution levels, withdrawals etc. Amounts shown are in today's dollars and exclude any non-superannuation assets or entitlement to age pension. Current tax and superannuation laws remain unchanged.
